A PARTNER FOR YOUR COMPANY

The HANSA PARTNER Group can count many companies from the shipping industry and the property sectors, as well as from manufacturing and commerce among its group of clients. The focus is on SMEs. Tax advice, legal advice, auditing and management consulting from a single source is offered by 15 partners and 110 employees. For more than 80 years, HANSA PARTNER has established itself as an expert and reliable contact for companies and their owners, well beyond the boundaries of the Hanseatic City of Hamburg.

Innovation, personality and far-sightedness characterise cooperation with HANSA PARTNER.

As a member of "BKR International" HANSA PARTNER offers its clients the expertise of an international network with 500 locations in more than 80 countries. This gives clients access to advice on matters associated with their international business activities.

Tax Advice

We offer sound advice in all matters relating to increasingly complex tax law. The focus of our activities is on strategic tax advice and formative tax advice for companies. From us, you can expect comprehensive and forward-looking advice in all areas of taxation, based on a strong entrepreneurial understanding.

Legal Advice

Our proactive legal advice and structuring ensure your business success. As a result of the interdisciplinary cooperation between legal advice on the one hand and tax advice and auditing on the other, consistent specialisation and permanent quality assurance, we offer comprehensive and economic structuring advice. We combine many years of experience, sound legal knowledge and well-founded expertise in the sectors with a good feel for your negotiating position.

Auditing

For us, auditing is more than just issuing a certificate on having carried out an inspection. From us, you can expect advice that provides audit certificates to give audit opinions that are reliable in the long term. That helps you to identify risks in time and to initiate appropriate measures. We therefore put you in a position to identify and exploit new potentials.
